

CATEGORY 2 - Online module

## MAYBE IT'S MITOCHONDRIAL DISEASE

Update your skills in the diagnosis and management of mitochondrial disease by completing this CPD-accredited online module.

- Free of charge
- Complete in your own time

In a 2000 patient general practice, approximately 10 patients have mutations with the potential to cause mitochondrial disease.<sup>1</sup>

By piecing together the complex puzzle that is mito, you can help improve outcomes for people living with this devastating yet sadly underdiagnosed disease.

This module includes expert video commentary by Professor Carolyn Sue, Director of Neurogenetics at Royal North Shore Hospital and Director of the Kolling Institute, University of Sydney.
